

ASTRO Synthetic Surfaces

ONLY PREFERRED INSTALLER IN WA

WOULD YOU LIKE A RUBBER SURFACE WITH COLOURS THAT LAST AND LAST THROUGH THE YEARS?

ROSEHILL TPV INPLAY IS JUST WHAT YOU'VE BEEN LOOKING FOR.

NEW CHILDREN'S HOSPITAL PERTH WA

Benefits of Rosehill TPV (THERMO VULCANISED RUBBER)

- ❖ **Rosehill TPV has been developed in collaboration with Dupont Dow and has better colour consistency and UV stability, outlasting any other rubber across the spectrum.**
- ❖ **TPV by Rosehill Polymers has superior UV stability compared to any other rubber granule in the market, more appropriate to the Australian climate. It will not go white or bleed like EPDM (Ethylene Propylene Diene Monomer);**
- ❖ **Offers a much better colour consistency throughout;**
- ❖ **Does not leach black carbon or colour pigments;**
- ❖ **Does not contain heavy metals;**
- ❖ **Requires less polyurethane binder than EPDM;**
- ❖ **Long wearing**
- ❖ **Has high elastic recovery therefore does not embrittle;**
- ❖ **Non toxic / non allergenic;**
- ❖ **Made from a high quality virgin polymer;**
- ❖ **Contains no moisture and is not porous like some EPDMs. This means the polyurethane cannot be absorbed by the TPV, eliminating any foaming as can sometimes be experienced using EPDM.**
