CRICKET PITCH COVER

HEAVY DUTY RUBBER

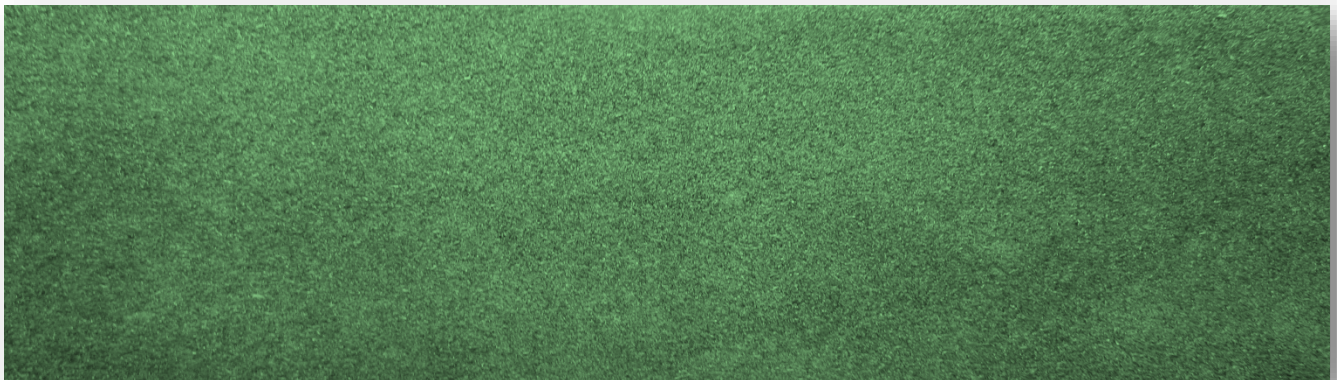

Astro has manufactured a durable hard wearing long lasting cricket pitch covers. Our installers have more than 10 years' experience in manufacturing.

Astro has tested their covers against other manufacturers. On testing, our covers have a much higher tear resistance and durability. This is due to our research and testing, various grades of rubber, binder and manufacturing techniques to produce a higher quality product.

Construction and installation of covers:

1. Two different grades of rubber;
2. High quality polyurethane binder mixed at higher percentage than normal;
3. Technique of rolling and finishing of cover;
4. Each panel is coded and has a tear test inspection;
5. Each panel has a formulated backing to make them tear resistant.

Astro Synthetic Surfaces is 100% West Australian owned and operated and majority of rubber products are made from Australian recycled materials. We can supply samples of the covers for viewing and tear testing.

ASTRO SYNTHETIC SURFACES ALSO SUPPLIES AND INSTALLS A RANGE OF HIGH QUALITY SYNTHETIC TURFS, SYNTHETIC TURF CRICKET PITCHES, SOFTFALL RUBBER FOR WATER PARKS, PLAYGROUNDS AND POOL SURROUNDS.

Our customers are City Councils, Builders, Architects, Schools, Child Care Centres and residential owners.

Astro Synthetic Surfaces takes pride in its professional quality surfaces with our installers having many years' experience.
