

**CRICKET PITCH COVER**  
**TURF TOP**

Astro has manufactured a durable hard wearing long lasting cricket pitch covers with a combination of rubber and Astro 25mm synthetic turf.

Previously, rubber covers tend to crack or start breaking down within a few years due to rubber absorbing U/V and wear & tear or when removing and installing each season.

Panel sizes made to suit  
customer's requirement

Width – variable to suit

Profile of Module

**SUMMARY:**

- ◆ The combination of rubber & turf bonded to each other produces a rubber cushioning effect.
- ◆ The turf is the protection wear layer on top of the rubber that does not allow the rubber to stretch or absorb UV.
- ◆ Astro's cricket pitch covers are built for the outdoor conditions.
- ◆ Each Pitch Unit (designated number of modules per pitch) can be stored as a flat pack, significantly reducing damage to the product. Our turf products may last up to 15 years, thus, saving you money in the long term and providing quality.

Astro Synthetic Surfaces is 100% West Australian owned and operated and majority of rubber products made from Australian recycled materials. We can supply samples of the covers for viewing and tear testing.
