WATER WISE PRODUCT RANGE

SOFTFALL MULCH

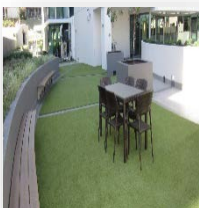

- a) **ALLOWS WATER TO DRAIN THROUGH TO SUB SURFACE.**
- b) Manufactured out of recycled rubber.
- c) Has a large range of uses including medium strips, around trees, garden areas or anywhere a permanent surface is required and has a life expectancy of approximately ten years. Easy to trim as trees grow.
- d) Due to wet pour installation, can be produced in any thickness and very cost effective compared to other alternatives.
- e) Non-slippery, hygienic and easy to maintain.
- f) In heavy traffic areas, it does not scatter, creating an unsightly mess and a slip hazard.
- g) It is dense enough to eliminate weeds and does not rot or wash away.

POROUS PEBBLE PAVING

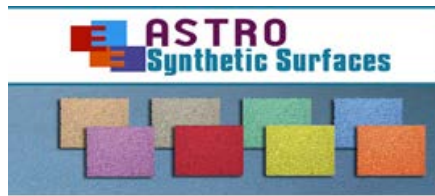

- a) **ALLOWS WATER TO DRAIN THROUGH TO SUB SURFACE.**
- b) Low maintenance – no weeds, puddles or loose stones to sweep up.
- c) Ideal for pathways and driveways. Can be installed over existing driveways and pathways without any demolition work – subject to being able to stabilise the existing base.
- d) Also suitable for forecourts, courtyards and tree surrounds.
- e) It is smooth and accessible – ideal for pushchair, bicycles, wheelchairs and mobility scooters.
- f) It is UV stable – there is no colour fading.
- g) Ideal for pool surrounds and aquatic centres. Slip-resistant due to its textured surface that allows water to run through, preventing puddle forming.

SYNTHETIC TURF

- a) **ALLOWS WATER TO DRAIN THROUGH TO SUB SURFACE.**
- b) Available for landscaping and sports surfaces.
- c) Soft, durable and realistic looking.
- d) Saves water. Perfect for patios, around swimming pools, etc.
- e) Synthetic turf remains uniform and consistent year after year and can be used within hours of installation.
- f) Unlike natural grass, doesn't require treatment with pesticides, herbicides, etc.

CRICKET PITCH COVERS

TURF TOP CRICKET PITCH COVER

- a) **COMBINATION OF RUBBER AND TURF BONDED TO EACH OTHER TO PRODUCE A RUBBER CUSHIONING EFFECT. IMPROVES IMPACT RATING.**
- b) **COMPLIES WITH THE AUSTRALIAN SAFETY STANDARD AS/NZS 4422:2016.**
- c) Turf is the protection wear layer on top of the rubber that does not allow the rubber to stretch or absorb UV.
- d) Built for outdoor conditions.
- e) Each pitch unit can be stored as a flat pack, significantly reducing damage to the product.

HEAVY DUTY RUBBER

- a) Two different grades of rubber.
- b) High quality polyurethane binder mixed at higher percentage than normal.
- c) Long wearing.

SOFTFALL KERBING

- a) **MADE FROM RECYCLED RUBBER.**
- b) Cost effective, quick to install and easy to remove.
- c) Very flexible and perfect for areas of expected vehicle impacts and unlike concrete, it does not crack, chip or breakaway.
- d) Each section measures 2.4m long x 170mm high x 120mm wide at base.
- e) Available in five (5) colours.
